## Haul-Out Facilities

### Dry Dock

Dimensions: 60.9m x 11.8m x 3m

The graving dock can accommodate vessels of up to 60 metres both with and without under cover protection depending on a vessel's requirements and is supported by dockside workshops.

### Side Slip

The side-slip can accommodate vessels of up to 200 tonnes and 40 metres in length. Located 20 metres from the main slipway and connected by rails.

### Slipway

The facility operates a slipway able to handle vessels of up to 1200 tonnes and 80 metres in length. Comprising of two (2) rails levelling out forward of headstock. The headstock can be removed to bring vessels further forward or to be taken to sheds 2, 3 and 4 for undercover work. Or alternatively, de-mountable shelters can be erected on the Slipway to ensure no weather-related impediment to timely work schedule completion.
